Aus Tiles

Lay-in ceiling installation

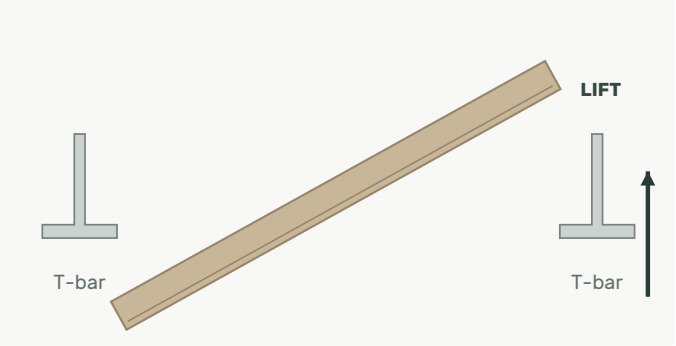
Lift through the grid, level the tile and lower it into position.

BEFORE YOU START

Confirm the tile suits the ceiling grid and there is enough clearance above the opening.

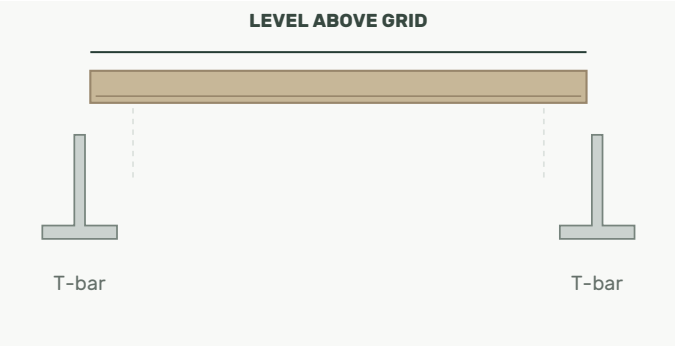
01 Lift and tilt

Support the tile with both hands. Tilt it on an angle and lift it through the ceiling grid opening.



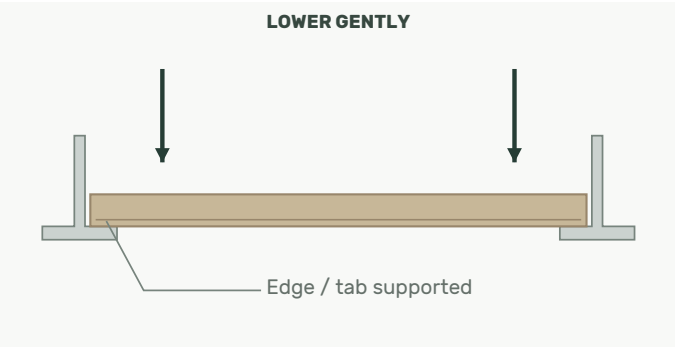
02 Level above the grid

Once the tile is clear of the T-bars, rotate it to a level position and centre it over the opening.



03 Lower into place

Lower gently until the tile edges or support tabs rest on the T-bars. Check that the tile is level and fully seated.



REMOVAL Support the tile, lift it clear of the T-bars, then tilt and lower it through the grid opening.

Schematic side views only. Tile profile and support tabs vary by design.
Review copy - confirm the seating detail for the selected tile before issue.
